Jobs

Developed Games on Freelance

- Created 6 small 2D and 3D games
- Worked with customers from all over the world
- Perfect rating from all 10 orders

Created a course for Innopolis IT School

- Carried out offline master class of Artificial Intelligence in 4 groups with roughly 25 people in each group
- Prepared interactive materials for learning Python
- Developed a game-like simulation for AI in Unity
- Received excelent feedback

Created App Concept for Kruzok Movement

- Developed the concept and designed web portfolio builder of a Kruzhok Association participant
- As of today the app is being developed and runs in beta mode

Projects

Crew Street

A web app that makes it possible for businesses to hire junior IT staff by abolishing sourcing and significantly increasing quality of candidates.

- Interviewed 10+ people and reasearched market for the first time
- As a direct result of research, original idea has been fully transformed to a more solid concept

Check out landing at crewstreet.ru

Sapientia Temporis Bot

This telegram bot helps students and teachers in my school get an up-to-date schedule for each day in the most convenient way possible.

- More than 300 total users (out of ~800 students in my school)
- Reached 100 DAU with 250 MAU
- Reached PMF: 38% would be very disapointed if they could no longer use bot

You can find this bot by searching it's name in telegram

Customer Journey Map of Yandex Market

- Conducted market reasearch and examined the app finding problems and developing solutions
- Was evaluated as a $1600/mounth specialist by Lead CX/UX researcher at Yandex
- Analyzed this work afterwards and will be improving on the experience in the new CJM (already in making)

Take a look at CJM in web version of this CV

Immersinity

Web app where you can create online presentations, displayed in audience's phones.

Try it at immersinity.com

Education

Innopolis University

I have been awarded full grant for Batchelors degree and will start studying in august 2022.

Samsung IT School

A year-long course on basics of Java, programming architecture and Android apps development. Have finished with excellence and by the end of the course created final project, achieving second place in nation-wide projects competition.

IT School at South Federal University

Studied fundamentals of programming for three years on Pascal ABC.Net and C#. Have finished all years with excellence.

Currently I spend most of my time learning new skills and applying them on small projects.
